

TORQUE_{V3}

PERFORMANCE FREERIDE/FREESTYLE

OZONE[®]

TORQUE^{V3}

Providing un-compromised performance for Freeriders and Freestylers, the Torque V3 is ultra smooth and responsive. It delivers explosive performance with amazing grip and smooth flex to stick your landings.

- Freeride/Freestyle performance
- Medium rocker and medium flex
- Hybrid Fiberglass and Carbon layup
- Quad concave hull for amazing control and pop
- Intermediate to advanced riders

HYBRID BIAX FIBERGLASS AND UD CARBON BEAM

The third version of the Torque features a new hybrid Biax Fiberglass and UD Carbon Beam layup.

This new construction increases flex at the tips and increases response from the center of the board.

LIGHT AND FORGIVING TO RIDE

Combined with a medium flex and rocker the Torque V3 feels light and forgiving to ride.

The 3D deck shaping has a progressive taper into the tips for precise feeling and flex patterns, enabling a smoother take off and softer landing even when going for big tricks at speed.

LOAD UP

The square tip outline means more rail and board surface area in the water to load up against for insane pop, whether you are boosting airs with straps or throwing unhooked moves with boots. It provides excellent edge retention and strong upwind performance.

QUAD CONCAVE HULL

An advanced quad concave hull design enhances tracking and pop.

Refined spines running the length of the board increase edge hold in strong winds and chop, providing ultimate control and precision when loading up for jumps.

SEND IT AND SEE

The feeling, response and predictability of the Torque V3 means it has never been so easy to progress in all aspects of twin tip riding, go send it and see!

FOOTPADS AND STRAPS V2

Having comfortable footpads and straps can be the difference between a good session and a bad one. Our V2 design provides the ultimate balance between performance and comfort to keep the good sessions rolling!

Our foot straps are ergonomically designed featuring Ultralon Performance Foam® and plush neoprene for the ultimate in comfort and control while providing a precise fit. Ultralon foam has an exceptional resistance to packing out, it doesn't compress over time and has an outstanding formability enabling anatomical adaptation. Combined with the quick and easy velcro size adjustment, the strap provides a snug fit to all foot shapes and sizes or wetsuit booties.

We have designed our footpads to provide superior comfort, adaptability and strength. The multi-density foam pads combine a shock absorption base layer and a higher density top layer with precise contouring and texture for increased traction to keep your feet comfortably locked in. The baseplate is built strong with nine strap positions and five stance angle options allowing for uncompromised adaptability.

TORQUE^{V3}

Range of Use:

Suggested Size & Rider Weight Range:

SIZE	WEIGHT
134 X 40 CM	50-70KG
136 X 41 CM	65-80KG
138 X 42 CM	70-90KG
140 X 43 CM	80KG+
142 X 44 CM	90KG+
